

High School Admissions

APRIL / MAY / JUNE 2025

BEC's Core Classes are here to help sustain and strengthen academic skills for high school admissions. These modular weekly sessions, taught by our experienced tutors, are specially designed to help current 7th graders maintain familiarity with key core concepts and retain academic skills through targeted small-group instruction. These small groups are crafted to boost students' confidence in their academic abilities while honing their strategic foundations to maintain their skills.

Our courses include curriculum tracking, homework, and online resources. All classes are held online via Zoom. Sessions are modular and students can attend any number of sessions offered.

REGISTER
